- Full-range supplier – Made in Germany

Vogel & Plötscher

In all width, depth and precision

Vogel & Plötscher GmbH & Co. KG is a specialist for precision mechanical products, electrical traction drives and measuring systems for track building and maintenance. With around 60 employees, the medium-sized company located in Southern Germany develops, designs, and manufactures hand-guided track measuring devices as well as customized solutions for electric traction drives. The associated electronics and software, as well as their programming are also provided in-house.

Vogel & Plötscher is a member of the ROBEL Group.

Maßnehmen.

With the experience of 60 years of development, V&P today is one of the leading manufacturers worldwide in track measurement technology. The product range includes mechanical and digital systems for measuring tracks and switches, track geometry as well as rail profiles and surfaces, thus covering all relevant measurement parameters of the track world. As a full-range supplier with high vertical integration, V&P sets benchmarks in accuracy, reliability, and efficiency.

antreiben.

Since 2013, V&P has also been developing and producing efficient and powerful axial flux motors. From customized one-offs to series production, they are available in various sizes and different power ranges. This allows them to be integrated into a wide range of applications. The associated electronics and their programming are also supplied in-house.

Brand features

- + More than 60 years of experience in track measurement technology
- + Electric motors with suitable gears
- + High quality products
- + Wide product range
- + In-house development, design and production
- + Highly qualified employees
- + Customized solutions
